Have you considered Global Educational Opportunities?

WJU now offers students unique and life-changing learning opportunities among other cultures as well as here in the U.S. to study abroad on short term programs to spending a full year at another university. Taking advantage of global study opportunities will breathe life and a whole new dimension to your studies. Merely reading about the cultures, geography, history, language, literature, and ecology can never compare with experiencing these same things in the environment in which they occur. As St. Augustine said, “The world is a book, and those who do not travel, read only one page.” Studying abroad is not only more exciting; it can give you a competitive edge in your future career. Check out these classes before talking to your advisor:
